Lego Competition

Join us for our LEGO Build Competition, where students will compete in teams of three to construct a LEGO structure against the clock. The team that completes the build correctly in the shortest amount of time wins!

This fast-paced challenge simulates a real-life construction project, highlighting the importance of teamwork, communication, and leadership. Just like in the real world, every team member plays a critical role in bringing the project together. Teams will have 30 minutes to complete the challenge.

Monroe Community College
STATE UNIVERSITY OF NEW YORK

Community Craftsmanship Awards

Purpose of the Award: To recognize exceptional programs & students that are giving back to their community via construction projects that exemplify high quality craftsmanship.

Projects eligible to be nominated: Work performed by youth ages 12-24 that give back to the community or benefit the community may be nominated for this award. *Eligible projects must be constructed between April 1, 2025 – April 15, 2026.*

Who May Make nominations: Community Programs, Students, Parents, Teachers, Project Recipients and Mentors are all eligible to make nominations.

Nomination Procedures: Nomination forms for identifying and describing the work will be made available on the ROBEX website.

Nominations must be received by the Awards Committee by April 17, 2026.

All nominations to be made electronically.

Winners will be announced day of the event.
